

Now we need to save water!

In Skåne, the water levels are lower than normal. We must all help each other to save water!

Tips on how to save water:

- Turn off the tap while brushing your teeth or shaving.
- Keep a water jug in the fridge instead of rinsing until the water gets cold.
- Run the dishwasher only when machine is full.
- Wash dishes by hand in a basin and not with the tap running.
- Take shorter showers and avoid running a bath.
